# Pre-Cast Concrete Storage Bins

## WALLS THAT STAND THE TEST OF TIME

- ▶ Featuring a modular component design for fast erection and completion. The tongue and groove design creates a sealed wall surface.
- ▶ The sections may be dismantled and relocated, making this the most flexible high quality storage option.
- ▶ These high-quality storage cells offer economical, large volume storage capacity, the lowest initial investment and the lowest fixed cost of any storage system.
- ▶ The modular constructed unit can be erected to meet your requirements...any length and width in 6' high sidewalls.
- ▶ The side panels and buttresses have reinforced ribs to provide the necessary strength without the cost and weight of full thickness panels.
- ▶ Before you buy, compare the quality construction and the lower investment of the **THE PRIME** modular storage bin system.
